

Session-15 Tool Tip

Wednesday, September 7, 2022 3:42 PM

What is Tool Tip

A Tooltip is a text that appears when a mouse hovers over an object/web element on a web page.

The object/web element can be a link, an image, a button, a text area, etc.

The tooltip text often gives more information about the object/web element on which the user hovers over the mouse cursor.

Example
